

We are changing the travel experience at Bradley – one upgrade at a time. From improvements to passenger flow and new furnishings, to new dining/shopping options, our goal is to have our passengers Love the Journey when they travel through.

DEPARTURES LEVEL

- As part of our ongoing efforts to improve the circulation of passengers, a new elevator was introduced in 2018 and we are exploring additional ways that traffic flow can be improved.
- In partnership with the TSA, we are also working to change the TSA-baggage screening system to make more space at the ticket counters.
- For added efficiency and convenience, we have also introduced several 'common use' ticket counters that allow multiple airlines to use them.

ARRIVALS LEVEL

- Introduced new elevator that connects to the departures level.
- Introduced new information center to better assist passengers.
- Plans are underway to also upgrade the entire level with a new look!

ENTIRE TERMINAL

- All of our restrooms are slated to be renovated by mid-year 2020.
